

Industrial Growth Platform, Inc.

## **Participation in Stanford University's The Silicon Valley-New Japan Project**

Tokyo, October 2, 2014--Industrial Growth Platform Inc. (IGPI) announced that it has become a strategic partner in The Silicon Valley-New Japan Project, planned and managed by the Stanford University Asia-Pacific Research Center Japan Program and Stanford University School of Engineering US-Asia Technology Management Center.

### About The Silicon Valley-New Japan Project

The Silicon Valley-New Japan Project was created to provide a platform to encourage the active exchange of ideas between Silicon Valley and Japan. It is planned and managed by the Stanford University Asia-Pacific Research Center Japan Program and Stanford University School of Engineering US-Asia Technology Management Center. Given the increasing importance of innovation in Japan's economy, the project plans to gather industry/academic experts from both Silicon Valley and Japan to conduct a series of initiatives such as public forums, research on Silicon Valley's ecosystem and policy debates. Through this, the project aims to discover how Japan's large companies/startups can 'harness' the Silicon Valley ecosystem and will also endeavor to strengthen the network connecting Silicon Valley and Japan.
