

Industrial Growth Platform, Inc.

Investment in Mobile Enterprise Application Platform venture company, Unifinity Inc.

Tokyo, October 21, 2015--Industrial Growth Platform Inc. (IGPI) announced its investment in Unifinity Inc., which is an MEAP (Mobile Enterprise Application Platform) provider.

Although the demand for enterprise applications is growing, there are still many obstacles to be solved for many companies, such as the rising cost of developing source codes for a wider range of OSs and their frequent updates. Unifinity Inc. provides an application development platform called “Unifinity”, which allows the development of mobile enterprise applications which works on various OSs (Android, iOS, Windows) without the need for programming. Moreover, the applications developed by Unifinity automatically adapt to OS updates.

Unifinity makes the development of enterprise applications significantly cheaper and faster. It is expected to be the big solution to enhance the productivity of all companies around the world. Using IGPI’s capital injection, Unifinity will move on to the next stage by hiring talented staff and investing to strengthen their competitiveness by expanding its platform functions.

IGPI will continue consulting Unifinity’s management to competitively raise their enterprise value and will also apply our network resource to make Unifinity a world leading development platform in the near future.
